FOR IMMEDIATE RELEASE
January 5, 2015

This winter get out of doors and capture images of Washington’s King Tide!

Join the Witness King Tide Initiative January 23-25, 2015 and photograph one of the highest tides of the year in locations along the Washington coast. These extreme tides provide a glimpse of what the future might look like as sea levels rise.

Washington Sea Grant invites you to help build that picture of the future with your photos! Upload your images of the King Tides to the Witness King Tides website and post on Twitter and Instagram using #kingtidesWA:

http://washington.kingtides.net

Your photos will join an international collection of online images visualizing future changes to our coastal communities.

For specific dates and times in your location, see the Washington Department of Ecology webpage (scroll down to map):

http://www.ecy.wa.gov/climatechange/ipa_hightide_map.htm

Plus, watch for more details on another King Tide event in February 2015!

For information and to make arrangements for filming or recording, contact MaryAnn Wagner at maryannb@uw.edu or 206-616-5363.

###
Housed in the College of the Environment at the University of Washington, Washington Sea Grant leads research, outreach and education for people to understand and address challenges facing our oceans and coasts.
