NOAA, Washington Sea Grant Offering Two Sessions of Science Camp

Registration is still open for this summer’s NOAA Science Camp in Seattle, but camp is filling fast.

Operated by Washington Sea Grant (WSG) and the National Oceanic and Atmospheric Administration (NOAA), the five-day summer camp sessions offer fun opportunities for seventh and eighth graders to explore marine sciences. Participants are introduced to earth and ocean sciences and to science careers through hands-on activities emphasizing solutions to real-world problems.

The camp sessions will be held July 18-22 and July 25-29.

Both sessions will feature a variety of NOAA science activities. Campers will try on dive gear and simulate a dive in a hyperbaric chamber, assess fish populations, analyze water samples, practice marine mammal identification techniques, learn to read navigation charts and more.

The fee for either of the five-day NOAA Science Camps is $225. Scholarships are available.

To register for either program, or for more information about the camp and scholarships, visit www.wsg.washington.edu/education/events/noaa.html or contact WSG Education Specialist Maile Sullivan at 206-543-2822 or mailesul@uw.edu.

NOAA Science Camp was established in 2003 through a partnership between Washington Sea Grant and NOAA’s Western Regional Center in Seattle.
Based at the University of Washington, Washington Sea Grant provides statewide marine research, outreach and education services. The National Sea Grant College Program is part of the National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce. http://www.wsg.washington.edu/
