

Yellow Rope on the Beach

What's the Story? An Industry Update

May 13, 2021

4:00PM – 5:00PM online

A webinar for students in grades 6-12

Register: <https://tinyurl.com/YR-May13>

Fragments of yellow rope are washing ashore on beaches in Washington and Oregon. Where did these three-strand braided yellow polypropylene rope pieces come from, and how can this type of marine debris be reduced?

Students, join this webinar to find out how yellow rope is used, ways the pieces escape into the marine environment, and the steps oyster growers are taking to find a solution for this problem. There will be time at the end of the presentations to ask questions of the panelists.

Presenters:

- * David Beugli – Director, Willapa-Grays Harbor Oyster Growers Association
- * Miranda Ries - Director of Regulatory Affairs, Aquaculture Division, Pacific Seafood
- * Margaret Pilaro – Executive Director, Pacific Coast Shellfish Growers Association
