If you live, work or play along Washington's coastal waters, Washington Sea Grant (WSG) serves you.

WSG has been a leader in marine research, outreach, and education for more than 45 years, helping people to understand and address the challenges facing Washington's oceans and waters. We work with people living within the 15 coastal counties and across the region on issues as diverse as salmon conservation, tsunami preparedness, small oil spills and ocean acidification.

WSG is one of 33 Sea Grant programs across the country, administered by the National Oceanic and Atmospheric Administration. We are housed within the College of the Environment, on the University of Washington's (UW) Seattle campus and maintain 12 offices throughout western Washington.

2017

From his studio overlooking Tongass Narrows in Ketchikan, Alaska, Ray Troll has made fish fun and evolution enchanting for fans worldwide. With scientific rigor, vivid draftsmanship and whimsical design, Troll captures the wonder and weirdness of the aquatic world, delighting children and biologists alike. He is a longtime friend of the UW who has collaborated with the Burke Museum and School of Aquatic and Fishery Sciences. WSG is honored to present Ray Troll's homage to our underwater neighbors.
